

## **Application for Accredited Statistician**

### **General**

- ◀ I have taken note of all the points in the Handy Hints.
- ◀ I realise that, to be accredited, I must have practical statistical experience at an autonomous level. Theoretical research does not, of itself, qualify me for accreditation. Nor does work where my activities are done under the close statistical direction of another person.
- ◀ I realise I may not apply for accreditation while I am still a full time student.

### **Claim for Accreditation**

- ◀ I have read the accreditation criteria in the information sheet.
- ◀ I have addressed all the criteria in my application.

### **Statistical training**

- ◀ I have provided details of my statistical training, including details of the content of each statistical subject that I have done.
- ◀ I have provided a certified copy of my academic qualifications.
- ◀ This training meets the requirements for a person to become a Graduate Statistician

### **Supporting evidence**

- ◀ I have provided details of 'up to five' (at least three) reports or papers where my practical statistical work is demonstrated. (Power Point presentations don't provide evidence of any depth.)
- ◀ I have provided copies of at least two of these papers or reports. If these papers are confidential, I have followed the procedures laid out in the information sheet for these papers to be viewed 'in confidence' by two members of the Committee.
- ◀ Where these papers or reports are jointly authored, I have described my statistical contribution in each one.

### **Practical experience**

- ◀ I have achieved the minimum specified period of statistical practice at a level where I take responsibility for my work. (This is normally at least six years, but this period may vary.)
- ◀ I have clearly laid out the details of my periods of employment in various positions, and the work which I performed in each position. The periods of employment include actual dates.

## **Referees**

- ◀ I have nominated, and provided full contact details of, two referees. Contact details include a postal address with the post code, a current email address and the title (Mr or Mrs, Dr, Professor, etc) of the referee.
- ◀ Both nominees have agreed to act as referees.
- ◀ At least one referee is familiar with my current statistical work, and both are familiar with my work in the past three years.
- ◀ At least one referee is a statistician of seniority in the profession.
